

# COLLARMAKER (DOVE TAIL WITH TABS)

Notch, bead, crimp & roll in one pass!

Save time and money by combining notching, beading, crimping and rolling in one operation.

For complete round starting collars 3 to 14 inches in diameter out of 24-30 gauge galvanized steel, the Lockformer® Collar Maker is the perfect tool. All it takes is one pass! Just cut to width and length or use scrap. This machine uses either 3" or 6" width blanks with simple movement of the crimp roll.

# ROTO NOTCHER

Dove-tail notch out of 24 to 30 gauge galvanized — in only one pass!

Just cut to width and length or use scrap. This machine uses either 3" or 6" width blanks with simple adjustment.

Model Details

# SPIN COLLAR MAKER

Make your own spin collars in minutes. Just cut galvanized stock (24 gauge & lighter) to width and length, set the diameter from 4" to 16", and push the blank against the automatic stop. A synchronized die notches the lead edge for easy spin-installation on the job site. The notched piece is then pushed past the stop, feeding the part into the roll former and finally into the automatic crimping and curling operations. Two models are available - Model 6 (2" to 6") and Model 12 (2" to 12").
